Zuma deluxe is an incredibly popular game. It was developed by PopCap games. The game starts out easy, but it is difficult very quickly. It has addictive quality that is extremely hard to match. Even among puzzle games. Oftentimes those who started just can't stop.

The game works by combining balls of the same color together and blow them up until no more balls come out for you to get rid of. The balls snake around the stage. weirdly you are a stone frog shooting the balls. It is strange.

Various elements are introduced so as to make life interesting. If the snake balls reach the hole, you lose the game. Do not worry, there is a point in every level where you will have blown up enough balls and you win!

The goal is to move all colored balls before they reached the hole. Luckily, once you fill up the green bar at the top right of the screen, no more balls will come out into the maze, but you still have to clear what is left.

The balls come out faster, the maze fills up faster. That's when you feel your hand cramping. To ease things up a bit, you can gain bonuses by blowing up more balls, blowing up special balls, and hitting a coin that pops out in the most unlikely places.

There are two modes of play ? Adventure and Gauntlet modes. The Adventure mode is the default mode and is essentially described above. The Gauntlet mode might drive you crazy as the balls just keep coming and coming and coming. To make it even more difficult, they come faster and faster and new ball colors are added as you go along.

The graphics are good. Not too complicated. The game plays well on older machines which is excellent. Also, you can play the game via the web, which is excellent if you are looking to take a break. If playing it on the web isn't enough for you, you can also try it out on Xbox 360 and even other platforms such as the iPhone. You really have no excuse not to have played this game before.

This is a fantastic game that is hours of fun. If you haven't rocked Zuma yet, you really really should. It's awesome! I have to admit that I've spent literally hours playing Zuma and once you get started you might find yourself losing an entire afternoon or evening to this game. It is just excellent like that.

Brian a writer and a toy collector. He also is excited about batman toys and dark knight toys. Find out more at <http://you-mart.com/toys/batman-toys.php>
