Text Magic Ltd. is one of the leading texts messaging developer that develops easy and flexible solution for the text messaging for corporate business houses, other developers and individual users. Their innovative and competent services have helped many people to improvise the communications with their employees, customers and other related folks. Their services are inexpensive, secure and upgradable to add the text messaging for their business conversations. TextMagic is privately owned company registered in the United Kingdom with the main objective to provide text message services within the country and worldwide clientele. So far they have provided their valuable services to the millions of the people around the globe. They claim to have provided the best possible services and solutions regarding the text messaging. They always apply and introduce the most innovative technologies into their services and solutions offered to the mass of business and individuals in the society.

Their unique email to sms service is really useful when email is your most frequently selected method of communication and they help you to send the text messages through the email. The receiver at the other end only has to pay the normal charges for sending the text without any additional cost. This service could be availed at any time provided you must have sent at least one message in the past. Moreover the most advantageous measure is you can send the text message using any of the fastest search engines optimization like yahoo mail, gmail and hotmail etc. The service has a capability to send three text messages per email inclusive of four hundred fifty nine characters and you will be reasonably charged as per the text message not the charges per letter or word. When any message is being sent, the delivery of the message could be checked by login into message log online the delivery status of the message could be known. If any message is not sent due to any reason, they would provide a report through the email so that the user would enable to know the next step of action. While sending the message, first of all you have to address the email to the phone number including the country code without adding any other punctuation. Before sending the email messages as the text messages, do not forget to remove all the attachments like HTML tags etc. The common usable email signatures and warnings are removed to state that the email has been received from your end. There is a facility offered if you want to receive all the answers on any other number of your choice so as to reduce the traffic. The replies of the recipients are sent to your email account directly in the full form or its original form with the sending details.
